

HENINTSOA ANDRIANAIVO RATOvonIRINA

Data Analyst — Power BI | Microsoft Fabric

Antananarivo, Madagascar • henintsoarat@gmail.com
LinkedIn: [/in/henintsoa-ratovonirina](#) • Portfolio: [arbi-data.vercel.app](#)

PROFILE

Data Analyst with 4 years of experience in data. From collection to modeling, I build reliable dashboards, automate data flows and reporting, and deliver actionable analyses to support decision-making.

TECHNICAL SKILLS

- Power BI** — Desktop & Service, DAX, Power Query, interactive reports, RLS, Report Builder
- Microsoft Fabric** — PySpark, Lakehouse, OneLake, Dataflows Gen2, T-SQL
- IBM Cognos Analytics** — Cognos expressions, complex SQL queries
- PySpark** — transformation, cleansing, complex aggregations, gold lakehouse
- Relational databases** — SQL Server, PostgreSQL, T-SQL, complex joins
- Advanced Excel** — VBA automation (PowerPoint, Access)
- Azure DevOps** — versioning, commit/merge, push/pull, deployment
- Git & GitHub** — version control and collaborative work
- REST API** — data integration
- Snowflake** — data validation / UAT
- Methods** — Agile / Scrum

LANGUAGES

Malagasy — native
French — fluent
English — professional working (technical)

EDUCATION

Bachelor's Degree in Computer Science

Networks and Systems
E-media, Madagascar · 2016 – 2019

CERTIFICATIONS

- Udemy · 2025
- Power BI** — complete training 2025
 - Microsoft Fabric** — versioning & deployment pipelines (Git, Azure DevOps, GitHub — CI/CD)
 - Advanced SQL** — subqueries, CTEs, window functions

PROFESSIONAL EXPERIENCE

Power BI Analyst

Mar. 2025 – Present

Voxens Madagascar / Stellant France · Permanent

- Identifying relevant data sources (internal databases, APIs, files, business tools).
- Setting up automated data preparation processes (Snowflake).
- Cleaning, transforming and modeling data (T-SQL, PySpark, DAX).
- Migrating 750+ client reports from Cognos Analytics to Power BI Report Builder (T-SQL, SQL).
- Designing KPI-driven dashboards (Power BI Service), tailored to each audience: management, business and technical teams.
- Building reliable and scalable data models in Microsoft Fabric.
- Facilitating business workshops and coordinating data and operational teams (Agile / Scrum).

Key achievements

- “Expertise” dashboard (Power BI / MS Fabric): tracking revenue and open or closed cases (DAX, PySpark, T-SQL).
- Dashboard for AXA (Power BI / MS Fabric): internal steering based on client-defined KPIs (DAX, PySpark, T-SQL).

BI Data Analyst — VBA Developer

Jan. 2024 – Mar. 2025

ARBI Madagascar · Freelance

- Mapping HR data sources (HRIS, shared Excel files).
- Designing the Power BI model (DAX, business calculation rules) and securing access by department and user (RLS).
- Running regular workshops with HR teams to update reports and KPIs.

Key achievements

- HR dashboard: average time-to-hire, application-to-hire conversion rate, turnover, absenteeism, internal mobility, gender pay gap, average annual salary increase, payroll-related HR claims (DAX, SQL).
- Reduced errors and significant time savings on payroll reporting and administrative tracking.

BI Reporting Officer

Jan. 2021 – Jan. 2024

WEBHELP Madagascar · Permanent

- Retrieving data from CRM, telephony and business tools (Salesforce, Zendesk, Talkdesk, Amazon Connect, Jira) via SQL queries and Excel extracts.
- Cleaning and transforming data in PostgreSQL; building a star-schema data model.
- Automating reporting and creating interactive dashboards for better performance visibility.
- Consolidating weekly, monthly and annual reporting; maintaining and optimizing Power BI files.

Key achievements

- Operational steering dashboard: average handling time, hourly productivity, service quality rate, absenteeism, revenue per case and per hour (DAX, SQL).
- Improved visibility on headcount and revenue; reliable decision-support materials.

Customer Advisor

Jun. 2020 – Jan. 2021

WEBHELP Madagascar / Orange Technical Support (France) · Permanent

- Handling customer requests related to connection failures (set-top box, router, Wi-Fi, fiber optic).
- Configuring PCs and phones on home networks; arranging replacement of faulty equipment.
- Diagnosing connection slowdowns (bandwidth checks) and providing personalized advice.
